

TOPSTONE is a highly durable solid surface interior material composed of nature's minerals and acrylic polymers to provide a remarkable product that is nonporous, easy to clean, stain resistant, and impermeable to almost all usual chemical substances.

Dirt or foreign properties cannot lodge in Topstone and it resists microbial growth. It is perfectly hygienic. It resists stains better than stone or marble.

Although Topstone is tough and high performing, it is easy to install, cuts like plywood, and shapes with normal power tools. The surface is renewable so any accidental nicks, mars, or scratches can be easily removed with 180 fine sandpaper or with a green Scotch-Brite® (registered trademark of 3M Company) pad.

Even cracks and breaks can be restored with our unique 2 part epoxy repair kit which also provides seamless joints for large areas and miters. The color and pattern of Topstone goes all the way through from top to bottom. It's so strong, we provide a residential lifetime limited warranty and 15 years for commercial installations. Topstone feels clean and smooth to the touch. It's simply elegant.
